Work Experience

Front-End Developer — DartStudio

2023 – Present

- Started as an intern and promoted to front-end developer.
 - Worked on **Bazambazi**, a mobile game and management platform.
 - Contributed to the **management panel**, **website**, and **game leagues** (pay-to-win system).
 - Developed and maintained the **React Native** mobile application.
 - Implemented responsive UI, state management with Redux, and optimized app performance.
-

Education

Master's Degree in Software Engineering

Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3
- **Frameworks & Libraries:** React, Redux, React Native
- **State Management:** Redux, Context API, React Hooks (useReducer, useMemo, useCallback, ...)
- **Tools:** Git, GitLab, VS Code

- **Mobile Development:** Familiar with Android (Kotlin) integration in React Native
 - **Other:** Clean code practices, scalable architecture, UI optimization
-

Projects

Portfolio Website

Personal portfolio showcasing skills, experience, and projects.

<https://peymanfazeli.netlify.app>

Dynamic Questionnaire System (React)

Built a fully dynamic form system rendering questions from JSON config, with validation and API integration.

Professional Interests

- Advanced React/React Native architecture
- Cross-platform mobile development and Native integration
- Scalable front-end development for large applications
