

Peyman Fazeli

Frontend Engineer | React • React Native • JavaScript

[Gmail](#) | [Telegram](#) | [Portfolio](#) | [GitHub](#) | [Linkedin](#) | [Medium](#) | [Virgool](#)

Summary

Frontend engineer with production experience delivering React and React Native applications from feature design to release. Skilled in performance optimization, scalable component architecture, and maintainable codebases. Comfortable collaborating across product and engineering teams while continuously improving developer experience and application quality.

Technical Skills

Languages	JavaScript (ES6+), HTML5, CSS3
Frameworks	React, React Native, Redux, Bootstrap
APIs	REST APIs
Tools	Git, Android Debugging
Practices	Performance Optimization, Component Architecture, Refactoring, Responsive Design

Experience

Frontend Developer — [BazamBazi](#) | 2023–Present

- Built and maintained production web, admin, and mobile applications using React, React Native, and Redux.
- Delivered end-to-end features by integrating REST APIs and shipping production-ready UI.
- Improved rendering performance by reducing unnecessary re-renders and refactoring components for maintainability.
- Diagnosed production issues, collaborated with distributed teams, and contributed to a healthier engineering workflow.

Featured Projects

- [WordRush](#) — Browser-based word game focused on architecture, persistence, testing, and UX.
- [TicTacToe](#) — Multiplayer game with Telegram Mini App integration.
- Finance Assistant — Personal finance frontend application.

Publications

- Technical articles published on [Medium](#) and [Virgool](#) covering React Native, frontend engineering, and software development.

Education

M.Sc. Computer Software Engineering — Sadra University (2016–2019)

B.Sc. Computer Software Engineering — Ershad Damavand University (2014–2016)
